

PP220 2K

/ RECTANGULAR TUBE AND FLAT BAR MIRROR POLISHING

DEMONSTRATION VIDEO

OVERVIEW

__ Each station is equipped with 400mm diameter and 220mm width polishing wheels

__ Two 45 liters tanks combined with two spray guns to apply the liquid compound in the polishing wheels

__ through-feed system delivers a fast output in rectangular/square tubes and flat bars mirror polishing

TECHNICAL SPECIFICATIONS

working capacity (mm)	220X200
feeding speed (m/min)	2-8
polishing wheel speed (m/s)	up to 35
polishing wheel dimensions (mm)	Ø400x220 (x2)
polishing wheel motor (kW)	7.5 (x2)
consumption (A)	80
dimensions (mm)	2600x1245x2160
weight (kg)	2150s

__ PP220 2K machine gives a high quality gloss mirror polishing to rectangular tubes

__ independent polishing stations with wheels oscillation and direct spray guns

__ easy to set working height, polishing wheels and conveyor belt speed, liquid compound timer, polishing discs oscillation and motors consumption
